

## Overview: EdSight Aggregated Data, Expenditures

The files available here contain expenditure data scraped and organized from the Connecticut State Department of Education's *EdSight* web portal.

This data has been aggregated and organized to allow for easier access to Connecticut education data and information. This data was retrieved on 07/07/2017 and has not been altered in any way. To access the most up-to-date education data made public by the Connecticut State Department of Education, please visit <http://edsight.ct.gov>.

District expenditures by revenue source can either include or exclude construction costs. These can be distinguished by filtering by the source file name. For the other expenditure files, the variable distinguishes between absolute dollar amounts and overall percentages. The totals are broken down by expenditure type. Please find below a description of each file with column headers and descriptions.

### File: Annual-expenditures-district

| Column Header | Description                             |
|---------------|-----------------------------------------|
| District      | Name of the school district             |
| Year          | School year                             |
| Variable      | Type of expenditure                     |
| Value         | Type of expenditure in absolute amounts |

### File: Per-pupil-expenditures-district

| Column Header | Description                              |
|---------------|------------------------------------------|
| District      | Name of the school district              |
| Year          | School year                              |
| Variable      | Type of expenditure                      |
| Value         | Type of expenditure in per-pupil amounts |

### File: Revenue-sources-district

| Column Header    | Description                                                                                                                                                                                                  |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| District         | Name of the school district                                                                                                                                                                                  |
| Source_file_name | Section from <i>EdSight</i> and filters applied from which the data was gathered. There are two different sources here, one whose calculations include school construction costs and one that excludes them. |
| Year             | School year                                                                                                                                                                                                  |
| Variable         | Source of the revenue (local, state, federal, or tuition/other)                                                                                                                                              |
| Value            | Percentage of revenue coming from the given source                                                                                                                                                           |

**File: Annual-expenditures-statewide**

| <b>Column Header</b> | <b>Description</b>                                                                                                                                   |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| Type                 | Type of expenditure                                                                                                                                  |
| Year                 | School year                                                                                                                                          |
| Variable             | Indicates whether the value represents the percentage of total yearly expenditures for the given type of expenditure or the absolute spending amount |
| Value                | Total expenditure or percentage of total yearly expenditure, as determined by the variable                                                           |

**File: Per-pupil-expenditures-statewide**

| <b>Column Header</b> | <b>Description</b>                                                    |
|----------------------|-----------------------------------------------------------------------|
| Year                 | School year                                                           |
| Variable             | Type of expenditure                                                   |
| Value                | Per-pupil expenditure of the given expenditure and for the given year |
