

Overview: EdSight Aggregated Data, Demographics

The files listed here contain school, district, and state demographic data scraped and organized from the Connecticut State Department of Education's *EdSight* web portal.

This data has been aggregated and organized to allow for easier access to Connecticut education information. This data was retrieved on 07/07/2017 and has not been altered in any way. To access the most up-to-date education data made public by the Connecticut State Department of Education, please visit <http://edsight.ct.gov>.

Districts and schools are identified using names and numeric codes. In these files, filter by the "Source_file_name" column to see the exact group of data for which you are looking. Asterisks in the "Value" column represent data suppressed from the State Department of Education in order to ensure confidentiality¹.

State-level student counts are disaggregated into multiple demographic categories. Filter by category to display yearly totals, student counts filtered by a single category, or student counts filtered by multiple categories. Each individual filter has its own column. Please find below a description of each file with column headers and descriptions.

File: Enrollment-district

Column Header	Description
District	Name of the school district
District Code	Code associated with the district
Source_file_name	Section from <i>EdSight</i> and filters applied from which the data was gathered
Year	School year
Variable	Group or subgroup to which the enrollment count refers
Value	Enrollment count for the given variable, year, and district

File: Enrollment-school

Column Header	Description
District	Name of the school district
District Code	Code associated with the district
School	Name of the school in the school district
School Code	Code associated with the school in the district
Source_file_name	Section from <i>EdSight</i> and filters applied from which the data was gathered
Year	School year
Variable	Group or subgroup to which the enrollment count refers
Value	Enrollment count for the given variable, year, school, and district

¹ The Connecticut State Department of Education Data Suppression Rules can be found at <http://edsight.ct.gov/relatedreports/BDCRE%20Data%20Suppression%20Rules.pdf>.

File: Enrollment-statewide

Column Header	Description
Category	States whether there are multiple filters, one filter, or an aggregate yearly count
